

# CHEATING

## like a PRO

A FEW TOOLS TO GET YOU PIXELING  
AND CONVERTING FOR C64

# AGENDA

- \* A quick note about wiring
- \* Tools
- \* Conversion Mistakes
- \* Tricks to look smooth
  - Palette fixing
  - Dithering
  - Anti-aliasing
- \* Deep Dive: Multipaint

IS WRITING OK?

# The Trooper by Carrion/Bonzai

## The Trooper - BZ [2021]

**Released by :**

Bonzai [web]

**Release Date :**

4 January 2021

**Type :**

C64 Graphics (MultiColor + Sprites)

User rating:  9.7/10 (39 votes) [See votestatistics](#)

 10/10 (11 votes) - Public votes only.

**Credits :**

Code .... Walt of Bonzai, Miami Fun Project

Music .... 6R6 of Nostalgia, SHAPE

Graphics .... Carrion of Bonzai

IS WIRING  
ART  
OR  
CRAFT?

# TOOLS

Lots to choose from. The ones I cover here are:

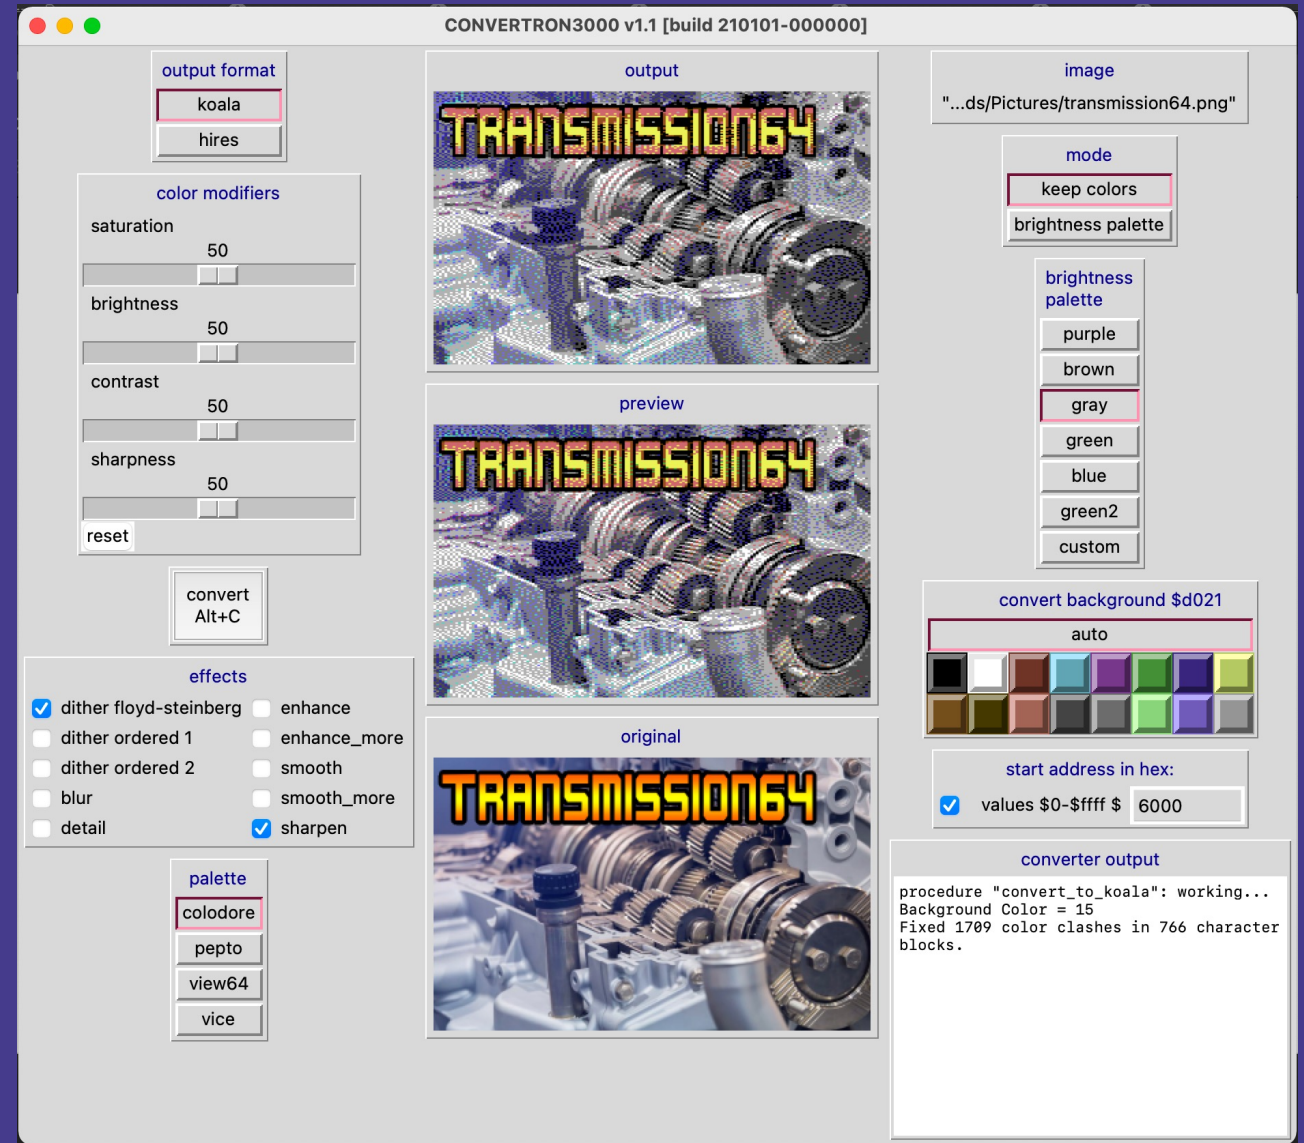

- \* Multi Platform
- \* Free
- \* Used by me :)

# CONVERTRON 3000

FieserWolf/Abyss Connection

- + Lots of tweaking options
- + Brightness palettes
- + Dither options
- + Live preview
- Only .koa output

<https://github.com/fieserWolf/convertron3000>

# DITHERIDOO

## FieserWolf/Abyss Connection

- + Granular 8x8 control
- + Dither brushes
- No zoom
- No tools (circle, line, etc)
- Only .koa support

<https://github.com/fieserWolf/ditheridoo>

# RETROPIXELS

Michel de Bree

- + NPM/CLI tool
- + PNG, Koala, Sprites, FLI and AFLI
- + Dither and palette control

```
retropixels --format png paintface.jpg
```

<https://www.micheldebree.nl/posts/retropixels-0-7-1/>

# MCDRAW

Zooperdan/DESIRE/PriorArt

- + Runs in the browser!
- + Koala/PNG support
- + Validates colour clash
- + Dither brushes
- + Preview in VICE!
- Buggy drawing in zoom  
(fixed soon, I guess)

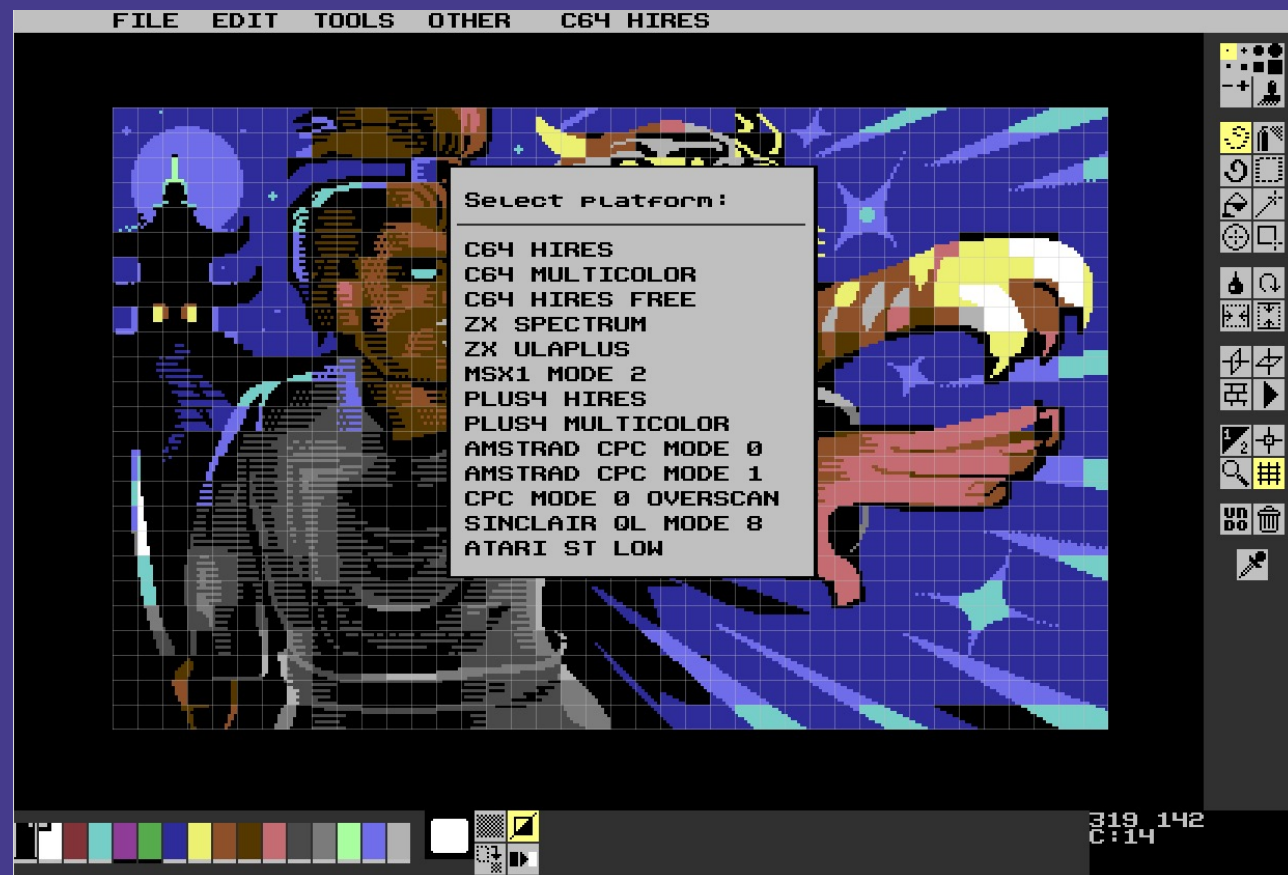

<https://mcdraw.xyz/>

# MULTIPAIN

Dr. TerroZ

- + Lots of platforms!
- + PNG/Bin support
- + Validates colour clash
- + Dithers
- + Snap to char
- + Recolour mode
- + Play brush for sprites
- Resource hungry

<http://multipaint.kameli.net/>

conversion

mistakes

# CONVERSION MISTAKES

- \* Relying on rescaling

  - (Start with 320\*200 or multiples)

- \* Make the thing bigger(TM)

- \* Relying on AFLI/UIFLI/IFLI to bring magic

- \* Starting with a full colour image (worse: JPG)

# 64 TRANSMISSION

96 80  
C:8

## Save for web

**Fact:**

It is easier to set a few  
good looking pixels than  
to find all the wrong ones.

tricks to

look smooth

# FIXING THE PALETTE

- \* Most conversion tools use luminosity of the colour to match to one of the C64 ones
- \* C64 luminosity is a very complex matter
- \* This is why badly converted images will use mid grey, light red and light blue interchangeably
- \* Often this means cleaning out lots of weird looking pixels

# IN SUMMARY

- \* Art is hard
- \* Craft is knowledge and repetition
- \* Using powerful tools is OK
- \* Selling other people's work as yours, less so
- \* A bit more effort yields great results
- \* There are lot of channels out there talking about pixel goodness, come and take a look!

# GO FORTH AND PIXEL
